EDUCATION

- **FPT University** Da Nang, VietNam
Bachelor of Engineering in Software Engineering; GPA: 3.10 *Sep. 2023 – Dec. 2026*

EXPERIENCE

- **Nam Tín Packaging & Printing Company** Da Nang, Viet Nam
Web Developer (Freelance / Project-based) *Jun 2025 – Aug 2025*
 - **Company Website Development:** Designed and developed a professional company website to showcase products, production process, and contact information.
 - **Frontend & Backend Implementation:** Built responsive user interfaces using **HTML**, **CSS**, **JavaScript**, and implemented backend logic with **Java Servlet**.
 - **Database & Performance:** Managed company data with **SQL Server**, and optimized website performance and SEO visibility to improve customer engagement.

PROJECTS

- **Travel Booking Website** FPT University
Individual Project – Java Servlet, HTML/CSS/JS, SQL Server, AI Chatbot *Jan. 2025*
 - **Description:** Developed a web-based travel booking platform that allows users to explore and book domestic and international tours. The system provides detailed tour information, destination highlights, and transparent pricing.
 - **Role:** Handled the entire development process including frontend, backend, database design, documentation, and AI chatbot integration.
 - **Outcome:** Achieved a final score of 9/10. Strengthened full-stack development skills, improved API integration efficiency, and optimized database design for better maintainability.
- **Football Field Booking System** FPT University
Team Project – Java Servlet, HTML/CSS/JS, SQL Server, AI Integration *Apr. 2025*
 - **Description:** Built a football field booking and management website to help customers easily find and book available fields, view services, and select nearby locations based on their current position. Stadium owners can manage, add, edit, and delete fields and services.
 - **Role:** Contributed to all key components including frontend, backend, database, API, and AI features.
 - **Outcome:** Received a final score of 8/10. Gained deeper experience in API integration, full-stack coordination, and database optimization.

PROGRAMMING SKILLS

- **Languages:** Java, C++, C, JavaScript, HTML, CSS, SQL **Technologies:** Java Servlet, React, SQL Server, Git, Figma
